Title: Applying Positive Behavior Support within the Context of Family Lives

Learning Objectives: Participants will be able to...

1. Explain the role of positive behavior support in families, namely prevention and management of behavioral challenges.
2. Describe how the key features of positive behavior support (i.e., lifestyle enhancement, assessment based intervention, comprehensive support plans) are applied with families.
3. Identify the ways in which research is shaping family-based behavioral interventions, and gaps in both research and practice.

Description of Event Content:

This webinar presents information on why and how positive behavior support principles can be applied in family life. It covers the current research and effective practices, and outlines future directions. Video scenarios will be used to illustrate key features and there will be opportunities for interaction via chat.

Agenda for the presentation:

- Rationale for family-based PBS
- Application in family homes
- Research in PBS with families
- Future directions
